In FIFA Ultimate Team, you will see changes to players' style of play based on the HyperMotion Technology. There will be a new training mode added that will teach you different tactics and techniques to work on. This will increase the scope of improvements to tactics and increase the depth of tactics as well as learning the real life details of players. In this video, Creative Assembly's project director Mike Fulham explains how motion capture technology will impact the game, how you will be able to build your FUT squads, improvements to the transfer system, exclusive rewards in Ultimate Team and changes to player models and moves. **Gameplay Features** The vertical awareness and sensing of the player in FIFA creates the biggest difference in gameplay in FIFA 22 - the ability to dodge and glide in-line with the direction of movement. This is a totally new way of approaching the sport from a player's point of view that creates exciting new opportunities for players to use their skills in new ways. This also creates a new way of watching the game, as you will now have more freedom to keep your eye on the ball at all times. Of course, when the ball is in your area you should focus on tracking it, but when the ball is not in your area, you can switch your awareness to the direction you want to run in. This could be to make a last-ditch tackle or power-dribble, but it can also be to glide in the direction of a defender and go past them or switch the direction you are moving for an advantage. The second biggest change is that with the use of the player's skeleton and skeleton movement, all new animations have been created for tackles and all new animations have been designed with the aim of making them look more realistic. You can now glide for longer distances and make the perfect sliding tackle. Another new feature is the ability to execute a sliding tackle from a ball carrier's back, so you can make a tackle in a new way. This new tackle animation should help create a more realistic outcome with more satisfying controls and a better feel for how tackling should work in-game. Of course, you will still use the controls that you are accustomed to but the players will be able to get the right animation, making this form tackle look more powerful. You should also notice a big difference when you tackle moving players that will now slow them down. This should make tackling players more exciting, as it will give defenders more time to think and

Features Key:

- A great goalkeeping shape is back in FIFA 22, bringing a fresh low of depth at the highest level. Goalkeepers have never been better at low volume striking shots.
- InFamous, too, is more of a success on the PS4. With brand new melee attacks, new customisation options, and new enemy types, abilities, and movements, the two InFamous titles on PS4 offer a more complete experience, even if they're scaled down from the PS3 versions.
- The way players and AI react to contact has been improved, meaning smarter and more balanced AI. This is a high point in the series, and we hope EA gives us more of the same in FIFA 24.
- Additionally, the ball physics on the pitch have been improved, making it that much easier for your favourite players to touch it and see more shots go in.
- The all-new Frostbite engine and, in particular, the significantly improved lighting has made the world of FIFA more beautiful than ever, providing a never-better picture.
- Made with the help of the very best in soccer analytics, FIFA 22 uses hyper-detailed data from actual matches across the best leagues around the world to ensure that every contest in all game modes is truly authentic, every match is truly earned, and every goal is truly scored.
- Graphically, FIFA 22 is the most powerful FIFA yet. Everything looks stunning, the stadiums are larger and more detailed than ever, the ball behaves at higher speeds, and crowds and crowds of players react to your every touch and move.
- The player set-up methods have also been enhanced with the addition of free kicks in all directions, goal kicks, free headers and drag and passes while running. Highly popular skills such as dribbling, slide tackles, and goal kicks have been made even more responsive.
- FIFA 22 introduces 'HyperMotion Technology' and includes new features to bring the most realistic, immersive and interactive experience for players.

FIFA is the world's #1 videogame franchise and the best-selling videogame franchise of all time. EA Sports has created a complete FIFA experience, including: Football at its purest. Immersive, deep, strategic, tactical, and competitive gameplay allow you to control the outcome of every match in the most expansive and authentic football experience ever made. More quality and more variety than any other football videogame franchise. FIFA is now the biggest name in football videogames, with more than 500 licensed teams, clubs, stadiums, kits, and balls for over 40 leagues and competitions. More immersive online gameplay. FIFA's intelligent career mode now uses real-world schedules to create a more realistic experience when moving up the ranks. Online connectivity, all new friends & rivals, and the all-new Ultimate Team mode make FIFA bigger and better than ever before. New gameplay innovations. New player traits, new celebrations, and an all-new shot mechanic. Every aspect of FIFA is completely redesigned. FIFA Ultimate Team will also take on a new direction when introducing multiple game modes. An all-star and all-new commentary team will bring their uniquely humorous and insightful commentary style to every mode in FIFA. The game is also coming to select U.S. live sporting events on Xbox One, PlayStation 4 and PC. Welcome to FIFA gameplay that's even better than the real thing! FIFA has always represented a pinnacle of excellence in football videogame design, but up until now has never brought the same amount of skill, strategy and technical innovation as the genuine article. Now with FIFA 22 you can step into the shoes of the world's best players and play the game as if you were actually there. FIFA 22 brings some of the most fundamental gameplay advances in the franchise's history. It's still football, but it's more football than you've ever played before. FIFA Challenge A brand-new take on the incredibly popular FIFA Ultimate Team modes, FIFA Challenge will allow players to compete and earn rewards by completing FUT matches against carefully selected rivals. Not only are the games easier to win and better paced than other FUT modes, the community will also have the ability to respond to the video matches, with the best submissions being played in the global leaderboard, which will be released in June. The brand-new game mode allows players to compete for rewards
